### 2021 - 2025

Viet Nam starts the National Digital Transformation under Decision No 749/QD-Ttg from 2021 to 2025 with target: 100,000 enterprises.

The project will implement a pilot program on digital transformation of 100 enterprises to help address the gaps in digital transformation in specific phases, including: pre-digital transformation; determining the maximum efficient to help small and medium enterprises increase productivity, efficiency and adaptability; merging and harmonizing systems to continue to increase productivity

Vietnam is one of the countries with a high rate of people using internet and smart mobile phones in the world. The connection infrastructure of Vietnam is relatively good, the internet is almost popular. In particular, Vietnam has a large number of young people with rapid access to technology, and a growing contingent of technology businesses.

#### **OUR TARGET**

We are the bridge of technology transfer in VietNam in RFID solutions for Retail, Healthcare and Manufacturing.

Minister of Planning and Investment
